

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (Currently amended) A multilayer thermoplastic resin film comprising ~~that is a multilayer film comprising at least two layers and comprises a thermoplastic resin, wherein the thermoplastic resin film comprises:~~ an intermediate layer and a printing layer positioned on one surface or both surfaces of said intermediate layer,

wherein said, ~~and inside the printing layer, an intermediate layer contain~~se ~~containing a non-transfer antistatic agent, and said printing layer does not contain the non-transfer antistatic agent.~~

2. (Currently amended) The multilayer thermoplastic resin film of ~~described in claim~~ 1, wherein the thermoplastic resin film is stretched in at least a uniaxial direction.

3. (Currently amended) The multilayer thermoplastic resin film of ~~described in claim~~ 1, wherein the printing layer has a printing surface having a surface resistivity of from 1×10^8 to $1 \times 10^{14} \Omega$.

4. (Currently amended) The multilayer thermoplastic resin film of ~~described in claim~~ 1, wherein the printing layer has a printing surface having an ink adhesion strength of from 0.5 to 10 kg•cm.

5. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 1, wherein ~~at~~ the printing surface of the printing layer is subjected to an activation treatment.

6. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 5, wherein after subjecting the printing surface to the activation treatment, a coating agent layer having an ink-an adhesion property is provided.

7. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 1, wherein the multilayer thermoplastic resin film contains inorganic fine powder and/or organic filler.

8. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 1, wherein the non-transfer antistatic agent includes a polyamide copolymer as a main component.

9. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 8, ~~wherein characterized in that~~ the non-transfer antistatic agent includes a polyether ester amide as a main component.

10. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 9, wherein the intermediate layer ~~contains a thermoplastic resin composition~~ comprises ~~containing~~:

Component (a): thermoplastic resin in an amount of from 5 to 95% by weight,

Component (b): polyether ester amide in an amount of from 5 to 35% by weight,

Component (c): polyamide resin in an amount of from 0 to 20% by weight, and

Component (d): inorganic fine powder and/or organic filler in an amount of from 0 to 70% by weight.

11. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 10, wherein the component (a) of the intermediate layer is a polyolefin resin.

12. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 10, wherein the intermediate layer further comprises ~~contains~~ from 0.01 to 5% by weight of a metallic salt as a component (e).

13. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 10, wherein the intermediate layer further comprises ~~contains~~ from 0.5 to 20% by weight of an ionomer as component (f).

14. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 10, wherein the intermediate layer ~~further comprises~~contains 1 to 20% by weight of a modified low molecular weight polyolefin as a component (g).

15. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 5, wherein after subjecting the printing surface to the activation treatment, a pigment coating layer is provided.

16. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 1, wherein the intermediate layer ~~comprises: contains a thermoplastic resin composition~~
~~containing~~

Component (a): thermoplastic resin in an amount of from 5 to 95% by weight,

Component (b): polyether ester amide in an amount of from 5 to 35% by weight,

Component (c): polyamide resin in an amount of from 0 to 20% by weight, and

Component (d): inorganic fine powder and/or organic filler in an amount of from 0 to 70% by weight.

17. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 16, wherein the component (a) of the intermediate layer is a polyolefin resin.

18. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 16, wherein the intermediate layer further comprises~~contains~~ from 0.01 to 5% by weight of a metallic salt as a component (e).

19. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 16, wherein the intermediate layer further comprises~~contains~~ from 0.5 to 20% by weight of an ionomer as a component (f).

20. (Currently amended) The multilayer thermoplastic resin film ~~of described in~~ claim 16, wherein the intermediate layer further comprises~~contains~~ 1 to 20% by weight of a modified low molecular weight polyolefin as a component (g).
